

Town of Bel Air

Important Notice on Construction Debris

The curbside pickup of large amounts of construction debris from Town residences often requires significant time and equipment on the part of our DPW refuse section. To help us with that effort, the following criteria for disposal of construction debris applies:

1. Any residential construction project which is performed by a contractor requires that the contractor dispose of the debris – it may not be placed at the curb for DPW pickup.
2. Projects that are undertaken by the resident are eligible for debris pick up, however, **ARRANGEMENTS MUST BE MADE TO HAVE ONE OF THE TOWN ROLL-OFFS LEFT AT YOUR RESIDENCE FOR THE WEEKEND IN WHICH TO DEPOSIT THE DEBRIS.**
3. The Town has (2) ten-yard dumpsters that can be reserved on a **FIRST-COME-FIRST-SERVED BASIS** and an application must be filled out at DPW. The container will be delivered to the residence on Friday and picked up on the following Monday.

Construction debris includes such items as: small amounts of concrete, bricks or cinder block; sheetrock; wood and metal studs; flooring; roof shingles; plywood; lath & plaster; fencing; pressure treated deck lumber; windows, doors, etc.

Not accepted: asbestos containing materials; large amounts of soil or large rocks; creosote railroad ties; hazardous waste; household refuse; large amounts of concrete and masonry material or asphalt.

If you are planning to do a project yourself, please call the DPW office to discuss your refuse removal needs with our staff. Based on the quantity of materials, we can advise you as to the most efficient way to have it picked up.

Note: If a significant quantity of construction debris is left at the curbside, the resident will be responsible for transferring it into a DPW container for removal – so please contact us first!

Please call 410-638-4545 any time between 8:00 AM and 4:30 PM. Thank you for your cooperation.
